				Group 5th	**Group 4th**	**Group 3rd**	**QF**	**SF**	**Runner up**	**Winner**
Irish Open*				75	225	375	1,500	3,000	4,875	7,500

1

The WWS world ranking list will be calculated using a two-year rolling points system. Please refer to the re-ranking document for confirmation of point drop-off dates.

At any event where players are seeded straight through to the knock-out stages and lose their opening match, they will receive zero ranking points for that event.

Group points set out above apply only where a player fails to qualify for the knock-out stages of an event. Should a player qualify for the knock-out stages from their group in 2nd position they will receive knock-out points only.

A player who enters an event and does not compete at least one match of the competition shall not receive ranking points.

Players who have not competed in an event during the previous two years will be removed from the ranking list.

Count Back: Players on equal prize money will be seeded/ranked based on the best performance (stage/round reached through winning a match) working backwards from the most recent ranking event. If still equal, frames won when losing will determine their position, working backwards from the most recent ranking event. For the purposes of count back, competing in an event and losing is treated as a better performance than not entering or competing in an event

*points breakdowns from these events may change depending on event format.
